

Accelerate your business.

JustIQ provides IT solutions to streamline student loan companies.

Our information systems help companies gain competitive advantages at every stage of the loan lifecycle—from generating leads through managing loan servicing data. We offer tools to facilitate precise analysis, accurate reporting and enterprise-wide sharing of all data associated with borrowers and loans.

Our clients operate more efficiently through the enhancement of existing IT investments. Partnering with JustIQ allows you to focus on your core competencies and accelerate your business processes.

Retrieve accurate information and reports with the click of a button

- Optimize indenture placements to maximize pricing.
- Create new custom loan products based on accurate analysis of customer behavior.
- Evaluate and predict risks and loan performance based on historical data.
- Attract favorable financing through comprehensive reporting on portfolio characteristics and performance.
- Automatically generate accurate reports.

JustIQ's Intelligent Warehouse gives executives instant access and control over all business data. We make it easy to create precise and reliable reports.

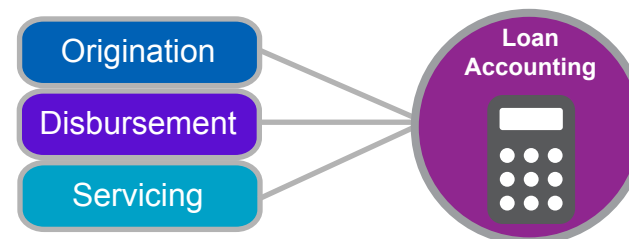

- Reg AB
- Loans-in-Transit
- Indenture Performance
- Benefit Compliance
- Prepayment Analysis

Our solution provides a complete and accurate view of your entire portfolio—from a high-level PCR report to minute details on every borrower.

Control every step of the origination and disbursement process

- Track loans-in-transit with precision and execute timely disbursements.
- Seamlessly integrate the Loan Accounting System with origination and disbursement systems.
- Reconcile loan accounting activity with bank transactions and identify the bond indenture for every loan repayment.
- Reconcile servicer reports and identify errors.
- Maintain a “paper trail” for every loan disbursement to simplify annual audits.

Our Loan Accounting System tracks every loan disbursement and refund payment. Our solution “talks” to multiple origination, disbursement and servicing systems to streamline the entire process. Data error and omissions are virtually eliminated.

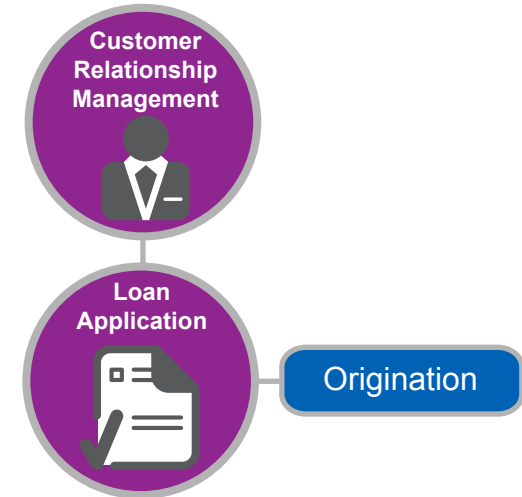

Integrate disparate systems to improve efficiency throughout the enterprise

- Automate and accelerate the loan application and approval process.
- Integrate the loan application system with a CRM to provide Customer Service with real-time data.
- Transfer loan application data to origination systems automatically.
- Enable prospective borrowers to complete the entire application process online.

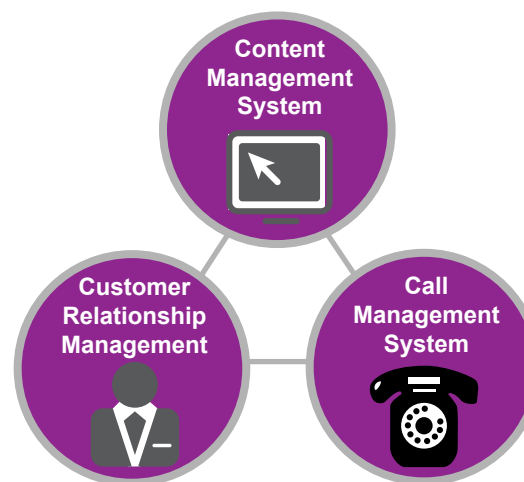

We develop Loan Application Systems to enable borrowers to complete the entire application process online and receive instant approvals. We enable companies to provide a higher level of customer service through multiple modes of communication and access to complete information. We streamline operations by automating every process.

- Components:
- E-signatures
 - Credit Reporting
 - Email Engines
 - PDF Generators

Capture qualified leads and improve the effectiveness of marketing campaigns

- Increase the volume of qualified, inbound leads.
- Record customer interactions from the first point of contact to the last call made.
- Follow the life of a lead and accurately track lead-to-loan conversion rates.
- Dynamically manage your websites without the aid of a webmaster.

We provide solutions to capture every customer interaction, thus enabling marketing executives to better understand their customers and focus on target markets. By transforming data from online loan applications, marketing campaigns and Customer Relationship Management systems into valuable information, we provide a complete view of every borrower and each loan.
