EDUCATION FINANCE EXPERTISE

We have over 250,000 project hours building information solutions for student loan companies. We understand how student loan companies work, industry regulations, government compliance issues and the business needs of lenders.

Our team understands how technology can solve business problems unique to student lenders. Because we understand your business, we communicate more effectively with your staff and offer creative solutions.

We are active members of industry associations including EFC, NCHelp and PESC. Participation in these associations enables our team to stay abreast of current regulations, industry trends, technology standards and market transformations.

In 2006, JustIQ was created as a division of Integrant Inc. specializing in information technology solutions for student loan companies. The JustIQ team is dedicated 100% to working on projects for student lenders and innovating new solutions for the industry.

INFORMATION TECHNOLOGY EXPERTISE

Integrant Inc., JustIQ's parent company, began building information solutions for finance companies in 1992.

Every developer is certified in their area of expertise. Achieving Microsoft Gold Partner status proves our team earned certifications in several competencies including networking infrastructure, data management and custom development. Our developers possess a wide range of skills and certifications. We are knowledgeable in:

- Commonline (CL4, CL5, CRC)
- XML, XSLT
- .NET
- ASP
- SQL Server
- Oracle
- J2EE
- My SQL
- C#, C++
- Visual Basic

TOOLSETS and CUSTOMIZABLE PRODUCTS

Since 2002, we have built solutions for every stage of the student loan lifecycle from lead generation to loan application, origination, disbursement and servicing.

In addition to providing plug-and-play tools to get you up and running quickly, we offer custom development, implementation, integration and configuration services for:

- Loan Processing
- Loan Accounting
- Data Warehousing
- Business Intelligence
- Customer Relationship Management (CRM)
- Call Management
- Content Management
- XML Integration
- Origination Systems
- Servicing Systems
