

JustIQ Open Architecture Solutions

JustIQ's Open Architecture approach to delivering solutions meets the unique needs of every client. We offer plug-and-play tools for immediate implementation. We also provide custom development, integration and implementation services to automate manual processes and integrate all internal and external systems. Most importantly, we are solution agnostic. Partnering with JustIQ enables student lenders to focus on their core competency, providing and managing loans. We empower your staff to streamline processes, increase productivity and manage more loans without adding headcount.

AGILE DEVELOPMENT

In the student loan industry, business requirements change constantly. Student lenders face new entrants to the market, the burden of compliance and policy changes on a daily basis. As a result, companies must find a flexible approach for building and maintaining technology solutions that align with transforming business processes.

Agile development enables our team to focus on the rapid delivery of business value. We utilize a development process that includes continuous planning and feedback from the client.

We always strive to align the delivered technology with the client's desired business needs and easily adapt to changing requirements throughout the process. As a result, projects are delivered on-time, on-budget and on-target.

Our Three Guarantees

After developing a detailed specification, we guarantee on-time, on-budget and fully functional solutions.
